

Guaranteed Saving

THE FIRST SOLAR ELECTRIC FLAT RATE

THE **R**EVOLUTION IN HOUSEHOLDS, BUSINESSES AND INDUSTRIES

Solar flat rate at a fixed price and with unlimited consumption depending on the contracted power

The new TSO Solar Electric Tariff is a new concept for everyone to enjoy renewable self-consumption, energy efficiency and a better environment, helping to reduce CO₂ emissions.

The Spanish Royal Decree 244/2019 of self-consumption allows households and businesses to become small generators of their own light, receiving credits from surplus energy that compensate consumption when there is no sunlight.

Up to 30% less

Save up to 30% on your traditional electricity bill, depending on the contracted power

A FIXED PRICE OF 0,125 €/kWh*

SOLAR FLAT RATE FOR INDIVIDUALS OR COMPANIES WITH A MINIMUM STAY OF 10 YEARS

Includes Solar PV Kit

We provide a study of the current electrical demand, an installation of the appropriate Solar Kit and start-up of the system, including a monitor or a tablet in which you can check the operation of the plant, its energy saving and the reduction in CO₂ emissions. After 10 years of stay, the solar kit becomes property of the client.

Includes Warranty and maintenance

All TSO kits have a 25year warranty. During the 10 years of effectiveness of the Solar Electric Tariff, TSO includes maintenance, conservation and theft or damage insurance services for the solar plant.

Includes 'Prosumer' management

We take care of managing the credits of the surplus of electricity production of the solar plant, compensating the electricity consumed during the periods of lack of sunlight.

Includes GRAE, the energetic coach

GRAE, thanks to a real-time monitoring of the solar plant, will advise you how to constantly reduce the electricity consumption.

GRAE will detect optimal energy consumption habits, it will offer advice and communicate the latest trends and technologies in energy saving, as well as marketing and dissemination of campaigns on how the CO₂ footprint is decreasing.

Includes Certificate ECO20®

TSO's Solar Electric Rate includes the ECO20® Certification by Bureau Veritas for companies.

The ECO20® seal makes it possible to stand out from the competition as a company that respects the environment, since it guarantees the consumption of a minimum level of energy from solar sources, not emitting greenhouse gases into the atmosphere.

(*)Fixed price in contracted powers up to 15 kW (rates 2.0A and 2.1A). For contracted powers greater than 15kW, the current kWh price will equal at least with 30% of the savings.

Contracted Power <15 kW	3.45 - 4.60 kW	5.75 - 6.90 kW	8.05 - 10.35 kW	11.50 - 14.49 kW
